HOW TO PLAY GAME:
W = Up
A = Left
S = Down
D = Right
X = Leave Game
C = Chat

1. Launch the Game

Start the backend server, WebSocket bridge, and frontend client. Once the browser window opens, you will see the main menu where you can enter a username.

2. Register Your Username

Enter any available username.

If accepted, you are added to the global player list and can now join or create game lobbies.

3. View Available Game Lobbies

Select “View Lobbies” on the menu.
The client sends: You will see either “GAMES EMPTY” or a list of existing rooms.

---

4. Create a New Game Lobby

Choose “Create Lobby” and enter a lobby name.
The client sends: This creates a room with up to 5 maximum players.

---

5. Join a Game Lobby

Choose “Join Lobby,” then select any room that is not full.
You will be placed inside the shared maze at starting tile (1, 1).

7. Play the Maze

Find the green exit tile in the maze.
When you step on it, the server broadcasts:

```
WIN <username>
```

Your score increases and you reset back to the spawn tile.

---

8. Chat With Other Players

Press **C** to open the chat bar.
Type any message and press **Enter**.
The server broadcasts:

```
CHAT <username> <message>
```

Messages appear in the bottom-left chat window for all players in the same room.

---

9. Leave the Game

Press **X** to leave your lobby.
You are removed from the lobby and returned to the main menu.

---

10. Unregister (Optional)

If you exit completely, the client can send:This removes you from all server lists.
